

622 FURNISHING BITUMINOUS MATERIALS

622.01 DESCRIPTION

Work consists of furnishing and delivering to District trucks, at the Contractor's or subcontractor's plant within the District, bituminous mixtures of the type specified, in such quantities as may be directed by the Chief Engineer and in accordance with provisions of these specifications.

A 24-hour notice of a change in location of the furnishing plant will be required except in case of extreme emergency such as mechanical failure in the plant.

622.02 MEASURE AND PAYMENT

The unit of measure for Furnishing Bituminous Mixtures will be the ton. The number of tons will be the actual number of tons placed in District trucks and weighed on approved scales at the Contractor's plant. The scales shall be of sufficient size and dimensions to accommodate District hauling equipment. The net weight as determined from the gross and tare weights will be the weight on which payment is to be made. No payment will be made on individual batch weights.

The number of tons of Bituminous Mixtures will be made for at the contract unit price per ton, which payment will include coating truck beds, weighing trucks on approved scales, and all labor, materials, tools, equipment and incidentals necessary to complete the work.
