

## SECTION 213 FINISHING ROADWAY

### 213.1 Description

- (1) This section describes destroying noxious weeds, cleaning out drainage structures installed under the contract, cleaning out material deposited in existing structures as a result of construction operations, removing and disposing of all litter and debris, and final trimming and dressing required to neatly and satisfactorily restore and complete the entire roadway for any project or portion of a project where grading and drainage or structures are a part of the contract.
- (2) This section also describes destroying noxious weeds; removing and disposing of all litter and debris; and the final shaping, finishing, trimming and dressing of shoulders, shoulder slopes and all other portions of the roadway disturbed by contractor operations, on contracts for constructing base, or surface course, on any project or portions of a project where grading and roadway construction was or will be substantially completed under other contracts.

### 213.2 (Vacant)

### 213.3 Construction

- (1) On contracts where seeding was completed under a previous contract, the contractor is responsible for all damage caused by its operations to the seeded areas or the vegetative covering within the right-of-way. Replace topsoil that was lost or contaminated with other materials, and reseed or restore all areas damaged by the contractor's operations.
- (2) Trim, shape, and restore the shoulders to the finished cross-section by means of grader and other equipment, supplemented by hand work, if necessary, to produce smooth surfaces and slopes and uniform cross-sections. For graded roadbed without surfacing, trim and dress the entire roadbed in the same manner.
- (3) Remove loose and waste stones not used in construction that fail to pass a 3 inch (75 mm) ring from the roadway and ground surface within all areas of the clearing and grubbing limits.
- (4) In urban or other areas that require a lawn-type turf, remove all loose or waste stones that fail to pass a one-inch (25.0 mm) sieve from topsoiled areas.
- (5) Do not drag, push, or scrape material across or along the finished pavement or surface course.
- (6) During the life of the contract, destroy all noxious weeds within the limits of the right-of-way by cutting or by other means and prevent the weed plants from maturing to the bloom or flower stage. The term "noxious weeds" as defined here consists of Canada thistle, leafy spurge, field bindweed, and other weeds that the governing body of the county or municipality where the project is located declares noxious, according to section 66.0407, Noxious Weeds, of the Wisconsin Statutes.
- (7) Before requesting acceptance of the work, if grading or structures are a part of the contract, clean out all soil, silt, or debris, and fully restore the waterways of all drainage installations and structures constructed under the contract. Remove all materials deposited or lodged in the waterways of all other drainage installations or structures due to contractor's operations.
- (8) Trim and dress the slopes of the roadway embankments and excavations to restore them to the established or specified lines and grades. Clear ditches and channels of debris and obstructions, and trim slopes and beds to true line and grade. Remove, shape, trim, and leave in a neat condition excess earth, debris, spoil banks, or other waste material next to culverts, bridges, ditches, channels, poles, posts, trees, or other objects. Remove stones, roots, or other waste materials exposed on embankment or excavation slopes that may become loosened and dislodged. Dispose of all slash and debris from clearing and grubbing operations, and leave the entire roadway in a neat condition. Fill holes and depressions that appear on the surface within the grubbing limits, caused by grubbing operations, with suitable material.

### 213.4 Measurement

- (1) The department will measure one Finishing Roadway for each project acceptably completed.

### 213.5 Payment

- (1) The department will pay for measured quantities at the contract unit prices under the following bid item:

<u>ITEM NUMBER</u>	<u>DESCRIPTION</u>	<u>UNIT</u>
213.0100	Finishing Roadway (project)	EACH

- (2) Payment for the Finishing Roadway bid items is full compensation for the work under this section. Payment includes restoring areas, seeded under a previous contract, damaged by the contractor's operations.
- (3) The department will pay separately for additional material from excavation required and furnished incidental to the repair of washouts under pertinent contract bid items or as extra work.
- (4) If the contract does not include a separate bid item for Finishing Roadway, then work under this section is incidental to the grading, subbase, base, structures, or surface course bid items.
