

SECTION 618 MAINTENANCE AND REPAIR OF HAUL ROADS

618.1 Description

- (1) This section describes maintaining, repairing, and restoring all public roads, streets, drainage facilities, and other components used as a designated detour or for hauling by contractor, subcontractor, or supplier to support work for a department contract to its pre-haul condition. Public roads and streets shall be limited to those not a part of the State Trunk Highway System and from now on called haul roads.
- (2) The contractor's obligation under this bid item does not authorize the use of haul roads for transporting loads exceeding statutory size and weight limitations.

618.2 Materials

- (1) Furnish and use materials in the work that are at least equal in quality and serviceability to those existing in the road before its use as a haul road. The engineer will determine the amount, quality, and acceptability of all materials.

618.3 Construction

618.3.1 General

- (1) The engineer will determine the type and quality of maintenance and repair required, including the quality of materials used. If 2 or more contractors having contracts with the department transport materials over the same haul road at the same time, or at about the same time, the engineer will determine the repair and restoration obligations of the respective contractors.

618.3.2 Maintenance

- (1) The engineer has the authority to order maintenance and repair work on haul roads, including dust abatement, at any time during hauling operations, as necessary to ensure reasonable service to other users of the road.
- (2) To prevent or minimize damage to haul roads the contractor may stabilize, reinforce, or strengthen existing facilities before hauling starts; and may condition the surface and perform repairs during hauling operations.

618.3.3 Restoration

- (1) Upon termination of hauling operations and before final acceptance, restore all haul roads, including drainage facilities and other components, to the equivalent of pre-hauling conditions.
- (2) The final repair of a haul road is subject to the engineer's approval.

618.4 Measurement

- (1) The department will measure the Maintenance and Repair of Haul Roads bid items as each individual unit acceptably completed.

618.5 Payment

- (1) The department will pay for measured quantities at the contract unit price under the following bid items:

<u>ITEM NUMBER</u>	<u>DESCRIPTION</u>	<u>UNIT</u>
618.0100	Maintenance and Repair of Haul Roads (project)	EACH

- (2) Payment for the Maintenance and Repair of Haul Roads bid items is full compensation for providing, hauling and placing required materials; and for other costs incurred by the contractor to prevent or minimize damage to the haul roads.
- (3) The department will pay for this item upon completion of all work under the contract, except the engineer may make partial payment for work performed.
- (4) If the engineer determines that no hauling occurred, or that hauled loads caused no damage to a haul road, the department may omit this bid item.
